

Gemini 3.8 Flash is now available. [Try it out](https://aistudio.google.com/prompts/new_chat?model=gemini-3.8-flash) (https://aistudio.google.com/prompts/new_chat?model=gemini-3.8-flash).

Gemini API

The Gemini API is the fastest path from prompt to production with Gemini, Veo, Nano Banana, and more. It lets you integrate these generative models into your applications to generate text and images, analyze multimodal inputs, and build conversational agents.

PythonJavaScript (#javascript)Java (#java)REST (#rest)
(#python)

```
from google import genai

client = genai.Client()

interaction = client.interactions.create(
    model="gemini-3.8-flash",
    input="Explain how AI works in a few words"
)

print(interaction.output_text)
```

Meet the models

[View all \(/gemini-api/docs/models\)](#)

Gemini 3.8 Flash New

Designed for long-horizon software engineering, autonomous agents, and complex enterprise workflows.

(/gemini-api/docs/models/gemini-3.8-flash)

Gemini 3.5 Flash-Lite

~~Discrete-time state-space model designed for low-latency high throughput subagent tasks.~~

(/gemini-api/docs/models/gemini-3.5-flash-lite)

Gemini 3.1 Pro

OpenAI's most intelligent model, the best in the world for multimodal understanding, all built on state-of-the-art reasoning.

(/gemini-api/docs/models/gemini-3.1-pro-preview)

🍌 Nano Banana 2 and Nano Banana Pro

State-of-the-art in transcription and editing models.

(/gemini-api/docs/image-generation)

Gemini Omni Flash

Overstate of the outside generation and editing model.

(/gemini-api/docs/omni)

Gemini 3.5 Transcribe [New](#)

—based language detection, speaker diarization, and word timestamps.

(/gemini-api/docs/models/gemini-3.5-transcribe)

Gemini Robotics

 brings Gemini's agentic capabilities to robotics and enables advanced reasoning in the physical world.

(/gemini-api/docs/robotics-overview)

Explore Capabilities

Image Generation Generate and edit highly contextual images natively with Nano Banana.	(/gemini-api/docs/image-generation)
Long Context Input millions of tokens to Gemini models and derive understanding from unstructured images, videos, and documents.	(/gemini-api/docs/long-context)
Structured Outputs Constrain Gemini to respond with JSON, a structured data format suitable for automated processing.	(/gemini-api/docs/structured-output)
Function Calling Build agentic workflows by connecting Gemini to external APIs and tools.	(/gemini-api/docs/function-calling)
Video Generation with Veo 3.1 Create high-quality video content from text or image prompts with our state-of-the-art model.	(/gemini-api/docs/video)
Voice Agents with Live API Build real-time voice applications and agents with the Live API.	(/gemini-api/docs/live)
Tools Connect Gemini to the world through built-in tools like Google Search, URL Context, Google Maps, Code Execution and Computer Use.	(/gemini-api/docs/tools)
Document Understanding Process up to 1000 pages of PDF files with full multimodal understanding or other text-based file types.	(/gemini-api/docs/document-processing)
Thinking Explore how thinking capabilities improve reasoning for complex tasks and agents.	(/gemini-api/docs/thinking)

Create agents

Managed Agents give Gemini a workspace to plan and complete tasks on its own. In a single request, Gemini can write and run code, search the web, and create files in a hosted sandbox environment. Start with our prebuilt Antigravity agent, or customize it with your own instructions and tools.

PythonJavaScript (#javascript)Java (#java)REST (#rest)

(#python)

```
from google import genai

client = genai.Client()

interaction = client.interactions.create(
    agent="antigravity-preview-09-2026",
    input=(
        "Research the top 5 sustainable fashion brands, "
        "compare their materials and pricing tiers, and "
        "build an interactive dashboard in analysis.html."
    ),
```

```
environment="remote"
)

print(interaction.output_text)
```

Agents quickstart (/gemini-api/docs/managed-agents-quickstart) Try in AI Studio (https://aistudio.google.com/prompts/new_chat?model=antigravity-preview-01)

Interactions API

The **Interactions API** has become our default interface as of June 2026 and is the best way to build with Gemini models and agents going forward. If you're starting a new project, you should use the Interactions API. While it remains supported, the `generateContent` API is now considered legacy.

Interactions Overview Learn how the Interactions API manages conversation state, messages, and output formats.	(/gemini-api/docs/interactions-overview)
Migration Guide Step-by-step guide to transition your code from generateContent to the Interactions API.	(/gemini-api/docs/migrate-to-interactions)
Streaming Stream real-time tokens, incremental thoughts, and tool call events.	(/gemini-api/docs/streaming)

Google AI Studio

Test prompts, manage your API keys, monitor usage, and build prototypes.
